

Mantle of the Expert Introduction for teachers

Mantle of the Expert is a teaching approach used in hundreds of classrooms around the world, including here in New Zealand. It's popular with teachers and students alike because it's engaging, collaborative, active, authentic, safe and meaningful. Learners are positioned as a team of experts working on a high-stakes commission. Through drama and inquiry, they encounter real-world tensions and explore multiple perspectives as they deepen skills and knowledge across the curriculum. Research has shown enhanced achievement in literacy (particularly oral and written language), maths, science and social studies and the Arts, as well as enhanced critical thinking, empathy and self-direction. For more info, visit www.mantleoftheexpert.co.nz or sign up for the workshops...!
